A Message from Leadership

We are pleased to share the *2025-2026 Marshall Health Network Provider Directory* as part of our ongoing efforts to improve care coordination and expand access to comprehensive services across our region. Under the leadership of President & CEO Scott Raynes, Marshall Health Network (MHN) continues its journey in becoming a unified academic health system. At the same time, Marshall Health, MHN's integrated group practice, is embracing a more holistic approach—aligning how we deliver care, educate future health professionals, and engage communities across West Virginia and greater Appalachian region.

This *Marshall Health Network Provider Directory* showcases the significant progress we've already made in integrating our clinical services. The *2025-2028 Marshall Health Strategic Plan* further outlines a vision for growth and collaboration across four key areas: accessibility, workforce, integration and innovation. The plan also reflects the specialized centers of wellness that have become central to Marshall University and Marshall Health Network.

- **Addiction & Behavioral Health:** We educate and innovate to improve care for substance use disorder, collaborating with communities and advancing clinical services. We leverage community partnerships to ensure comprehensive support for our patients.
- **Gerontology & Healthy Aging:** We enhance healthy aging through innovative research and care programs, improving quality of life for older adults. We collaborate with communities to support geriatric care and promote longevity and well-being, emphasizing specialized care for aging patients and caregivers.
- **Obesity & Diabetes:** We address chronic health challenges related to obesity, including diabetes, by implementing preventive strategies, providing specialized care and wraparound services to reduce the impact of these conditions.
- **Rural Health & Primary Care:** We expand access to primary care in rural areas, leveraging community partnerships and innovative care models to meet the unique health care needs of underserved populations. We promote equitable health care delivery to ensure better outcomes across rural communities.

Thank you for your ongoing trust and collaboration. Together, through the **Power of We**, we are shaping the future of health and well-being across our communities. We look forward to continuing our partnership and advancing care for those we serve.

ANESTHESIOLOGY

Chair: Jay A. Shepherd, MD

Department Administrator: Jarrett Gerlach, JD, MHA

Divisional Chief of Perioperative & Surgical Services: Anthony F. Dempsey, MD

The Department of Anesthesiology plays a pivotal role in the pain management, safety and comfort of patients undergoing surgical procedures. The department works closely with the staff anesthesiologists and anesthesiology consultants at partner hospitals to ensure access to various types of anesthesia, ranging from general anesthesia for complex surgeries to regional and local anesthesia for specific procedures.

Anesthesiology is a vital component of the medical curriculum. Therefore, the department provides comprehensive training for medical students and residents at the Joan C. Edwards School of Medicine, fostering a deep understanding of the principles of anesthesia, perioperative medicine and pain management.

PATHOLOGY

Chair: Krista L. Denning, MD

Marshall Pathology Department Administrator: Michael Blatt

Marshall Pathology works collaboratively with other clinicians at area hospitals to evaluate your lab work and, with your doctor, determine the best course of treatment. The experienced pathologists at Marshall Health Network evaluate specimens at Cabell Huntington Hospital, St. Mary's Medical Center and Rivers Health. In addition to serving patients at our hospitals and clinics, Marshall Pathology provides services to other area facilities and physicians' offices—accepting specimens or cases for diagnosis or consult.

Division Chief of Medical Specialties: L. Eric Carter, DO

Marshall Psychiatry & Behavioral Health Department Administrator: Angela Myhrwold, MS

Marshall Health Network offers outpatient psychiatric care and therapy to children, adolescents, adults and seniors in individual, family, couple and group settings. Our team treats mood, thought and anxiety disorders, autism spectrum disorders, ADHD and disruptive behavior and cognitive illnesses, including memory care and dementia. Testing is offered for ADHD, cognition, intellectual disability and learning disability. Transcranial magnetic stimulation (TMS) is offered for qualified patients with treatment refractory depression. The Mind Wellness Center is a day program for those who would benefit from intensified outpatient services.
